BASIC RULE IN SELECTING A PAINT ROLLER

FOR SMOOTH FINISH ON PUTTIED SURFACE : SMOOTH ROLLER / SHORT PILE ROLLER
(4 - 7 MM PILE / NAP SIZE)

FOR STUCCO / SAND FACED : EXTRA LONG PILE ROLLER
(20 - 25 MM PILE / NAP SIZE)

FOR NORMAL PLASTERED WALLS : SEMI SMOOTH / MEDIUM PILE ROLLER
(10 - 12 MM PILE / NAP SIZE)

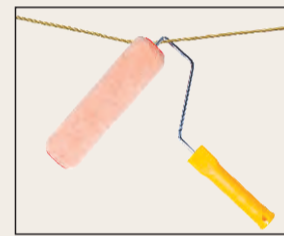

Note : For Smooth Textures in Puttied walls use medium pile or high pile Rollers

FOR ROUGH PLASTERED WALLS : ROUGH ROLLER / LONG PILE ROLLER
(15 - 20 MM PILE / NAP SIZE)

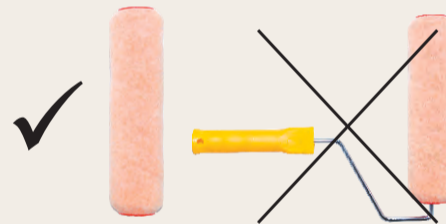

RECOMMENDED FOR SOLVENT BASED	RECOMMENDED FOR WATER BASED
TIA LAMBWOOL	TIA MERCURY
TIA MOHAIR	TIA NEUTRON
TIA SHEEP SKIN	TIA TITAN
TIA NATURAL WOOL	TIA NYLON

CLEANING TIPS FOR ROLLERS

✘ If the Roller is with handle & cleaned for drying, hang it on its handle on a clothesline, so that the roller should be in perpendicular position.

✘ If the Roller sleeve is removed from the handle and cleaned, keep the Roller in a standing position. Do not keep the Roller flat on the surface. Keep the Roller to stand after cleaning / Washing.

✘ After using **Water based Paints** (emulsion etc.), Clean the Roller with tap water first, followed by soap water wash for better results.

✘ After using **Solvent based Paints** (Enamel / Epoxy / Pu's etc.) Use the same thinner that is used for thinning the paint, for cleaning.
